WORK EXPERIENCE

WEB DEVELOPER/DESIGNER
UW-Stout Housing Design <2011-2013>
- Managed University Housing Website utilizing Commonspot CMS
- Created Housing related websites using HTML, CSS, Javascript, and ASP
- Used ASP to process form data and create/send dynamic emails
- Utilized Adobe Creative suite to edit/slice web compositions into images used for websites
- Hand-Coded HTML, CSS, Javascript and PHP to create a project management system for office use

STUDENT OFFICE MANAGER
UW-Stout Housing Design <2012-2013>
- Managed project assignment/management
- Managed and maintained office technology
- Experienced working as a team member both in leadership and support roles
- Interviewed potential new designers and web developers for housing positions

PROJECTS

POURWARD <2013>
Pourward was a project created for a client, Adam Ludwig, as part of my Senior Show. At client's request, I developed the branding, established social-media presence, created a database and designed and coded a website for the company. Pourward tracks the stories of random acts of kindness using HTML, CSS, Javascript and PHP.
View: *pourward.com*

PROJECT MANAGEMENT SYSTEM <2013>
The project management system was created for Stout's Housing Design as a means to assign, organize and manage projects. I created this system and its database to allow users to add and delete projects and users utilizing HTML, CSS, Javascript and PHP.
Example: *http://stephenthoni.com/projectManagement/*

HOUSING WEBSITES <2011-2013>
Created multiple websites for campus residential halls, housing campaigns and interactive, web-based departmental forms. These were created with HTML, CSS, Javascript, and ASP.
